

### Video Management Software

#### **Description:**

Costar Video Systems proudly introduces StarNET, the latest Video Management Software (VMS). StarNET was developed on the success of the popular iRAS platform. The powerful processing capabilities of StarNET allows it to manage multiple video streams from both Analog, HD-TVI and IP cameras. The StarNET platform allows for a decentralized management structure, which does not require a central point of access. The StarNET Client can be loaded on an unlimited number of computers and each user can customize their client based on their personal requirements. StarNET allows users to not only view both live and recorded images but quickly produce self-extractable video files that are universally portable to other computers without the need to load any special viewing software. Powerful visual reference maps allow the user to quickly view thumb nail displays of live images embedded within the map as well as link up to 64 map layers together. Multiple views can be displayed on multiple monitors simultaneously, including live viewing, playback and features such as interactive mapping, and advanced management tool to monitor health and generate status reports.

#### **Features:**

- Remote surveillance of live videos and remote playback of video recordings
- Real-time notifications of detected events and remote monitoring of event video
- Snap shot film strip marking the beginning of each motion event for finding target events
- Search by exact time, date or events
- Bookmark multiple recorded events for review
- Panic recording of live videos and playback
- Tabs include live view, playback, map, device check, health and others. Up to 4 of each tab type can be opened simultaneously and displayed multiple monitors
- Live images and maps can be view simultaneously on the same monitor
- Registration of up to 1,024 recording devices
- Simultaneous remote software upgrades and multiple system set up
- SSL support and authority settings by user groups for security

# StarNET VMS Specifications

## Recommended Requirements

Operating System	Microsoft Windows 7 64-bit (Home Premium, Professional, or Ultimate) Microsoft Windows 8 (Pro or Enterprise) Microsoft Windows 10 (Pro or Enterprise)
CPU	Intel Core™ i5-3570K 3.30 GHz or faster
RAM	4GB or more
VGA	AMD Radeon™ HD 7700 NVIDIA GeForce GTX650 1280 x 1024 32bpp or higher
HDD	6GB or more free space
LAN	Gigabit Ethernet or faster

## Minimum Requirements

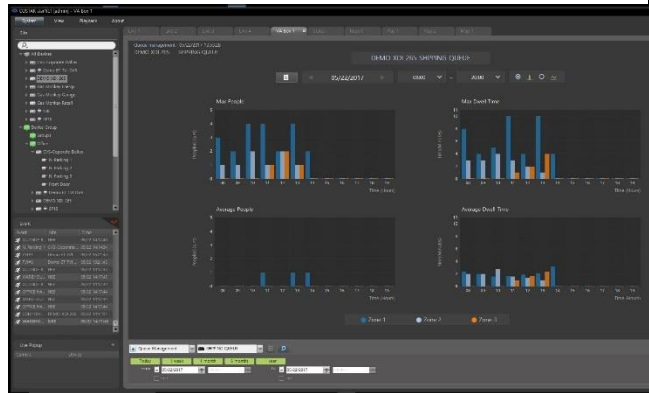

Operating System	Microsoft Windows XP (Home SP 3)
CPU	Intel Core™ 2 Duo E7200 2.53 GHz or faster
RAM	1.5GB or more
VGA	AMD Radeon™ HD 2400 NVIDIA GeForce FX5500 1024 x 768 24bpp or higher
HDD	1GB or more free space
LAN	10/100Mbps Ethernet or faster

## Fisheye Client-Side De-Warping Requirements

Operating System	Microsoft Windows 7 64-bit (Home Premium, Professional, or Ultimate) Microsoft Windows 8 (Pro or Enterprise)
CPU	Intel Core™ 2 Duo E7200 3.4GHz or faster
RAM	8GB or more
VGA	AMD Radeon™ HD 7700 or NVIDIA GeForce GTX6500 or higher
HDD	6GB or more free space
LAN	Gigabit Ethernet or faster

## Smart Phone Apps

iOS	StarNET Mobile i
Android	StarNET Mobile
